Natural pork & poultry chews

Our premium chews are produced to stringent quality and safety standards.

A broad selection of natural products enables our B2B partners to build a diverse offering tailored to different dogs and market needs.

Natural pork chews

Whole pig ears

Classic natural chews with a firm, crunchy and slightly chewy texture. Suitable for medium and large dogs, these chews provide a satisfying, moderately long-lasting chewing experience.

Pig ear strips

Conveniently portioned pieces with a firm, chewy texture. Easier to manage than whole ears, they are suitable for dogs of different sizes.

Pig ear inners

Naturally chewy treats with a firm yet flexible texture. Their manageable size makes them suitable for small and medium-sized dogs, offering a moderate chewing experience.

Pig snouts

Light, crunchy chews with an irregular texture and naturally appealing aroma. Suitable for dogs of different sizes, they provide a short to medium-lasting chewing experience.

Natural pork chews

Pork diaphragm

A lean, protein-rich treat with a firm and pleasantly chewy texture. Easy to portion and suitable for dogs of all sizes, it works well as an everyday snack or a rewarding treat.

Pork stomachs

Naturally aromatic chews with a firm, slightly elastic texture that dogs find highly palatable. They provide a medium-lasting chewing experience.

Pork skin strips

Dense and highly chewy pork skin strips designed for a satisfying, long-lasting chewing experience. Particularly suitable for medium and large dogs or dogs with stronger chewing habits.

Pork skin rolls

Natural pork skin rolls with a firm, chewy texture for longer-lasting enjoyment. These single-ingredient chews feature a rolled format suitable for dogs of different sizes.

Natural pork chews

Pork rib strips

Firm, crunchy chews made from pork rib sections cut into convenient strips. Designed mainly for medium and large dogs, they provide a moderately long-lasting chewing experience.

Pork lungs

Light and crunchy treats with a porous texture that makes them easy to break into smaller portions. Suitable for dogs of all sizes, including seniors and smaller dogs, they are ideal as light snacks or training rewards.

Moon bone

A substantial natural chew combining firm bone with collagen-rich cartilage. Suitable for medium and large dogs, it provides a challenging, long-lasting chewing experience.

Crescent cartilage

A firm yet slightly flexible chew with a naturally cartilage-rich structure. Suitable for small and medium-sized dogs, it provides a satisfying alternative to harder bone chews.

Natural poultry chews

Chicken gizzards

Compact, protein-rich treats with a firm and pleasantly chewy texture. Suitable for dogs of all sizes, they can be offered whole as a snack or divided into smaller training rewards.

Chicken necks

Crunchy natural chews containing bone, cartilage and connective tissue. They provide a satisfying short to medium-lasting chewing experience.

Chicken feet

Light, crunchy chews naturally rich in cartilage and connective tissue. Suitable for small and medium-sized dogs and as a quick natural snack for larger breeds.

About us

WE SUPPLY HIGH-QUALITY NATURAL DOG CHEWS AND BUILD LASTING BUSINESS RELATIONSHIPS BASED ON TRUST, FLEXIBILITY AND RELIABLE QUALITY STANDARDS.
